

Titan Logix Corp. Announces New USA Office

Edmonton, Alberta, March 10, 2011 – Titan Logix Corp., (TSX Venture: TLA), a Canadian advanced technology industrial instrumentation and controls company, opens its first USA office in the historic Downtown River Market, Kansas City, MO.

They selected the Gallo Office Building, in the River Market at 140 Walnut Street. The building owner, Chris Sally, was the broker for this multi-year lease. Chris helped the company with their improvements in their new 1,100 square foot office suite. Chris said that “for an office building to be successful, its tenants need to be successful”. Mark Rowland of the Downtown Council and Community Improvement District was also on hand to welcome both Les Evans CEO and Bob Logan Chairman of the Board of Titan Logix. The 2nd Street improvements and the services provided by the River Market Community Improvement District make this location a friendly and convenient location.

Les Evans CEO of Titan Logix Corp. reiterated at the opening that Titan’s vision is to be “the global market share leader in advanced mobile tank level measurement, control and asset management while growing our market interests in burner management and level gauging”. The opening of this office, as Les emphasized, is in keeping with Titans forward vision to penetrate further into the North American market and provide the opportunity to better service Titan’s USA customers. Last fiscal year’s annual sales for Titan Logix Corp. exceeded \$6,600,000.

John O’Connell, the Business Development Manager of Titan, is the member of the Titan management team located in the USA operation. With John’s 36 years of experience in the road tanker industry (formerly with Drum Industries and Civacon), he is key to Titan’s success in this expansion initiative. His experience and knowledge, along with the leadership of Titan’s General Sales Manager, Joe Callahan, will enable Titan to fulfill its commitment to develop its North American OEM and dealer network program.

The Kansas City location will serve as a sales and distribution warehouse for the USA market. This will support David Ciavarra, Technical Sales Representative in Texas, and Titan’s new northern USA Technical Sales Representative, Bryan Morris, who will be working out of the Kansas City office. The office/ warehouse coordinator is Jake Randall. He will be responsible for coordinating the supply of equipment to USA customers from this location.

About Titan Logix Corp.:

Founded in 1979, Titan Logix Corp. has evolved into an advanced technology industrial instrumentation and controls company. We design, manufacture, distribute and service instrumentation, control and automation solutions. These technologies are used primarily in the oil and gas, transportation and aviation industries, which for many years have relied on manual intervention. However, due to rising costs, concerns and awareness about the environment, (including the importance of spill prevention) and technological advancements - to list but a few reasons – we expect an increased demand for our products. The products we specialize in comprise an essential part of a complete asset management solution in the following categories:

- Transport Instruments: guided wave radar liquid gauging and control systems for mobile tankers;
- Level and Flow Instruments: mechanical and electronic liquid level gauging systems for storage tanks and industrial process vessels;
- Burner Controls: electronic burner management systems for atmospheric industrial heaters; and
- Telemetry and Control Products: communication and control systems enabling remote telemetry and management of site processes.

Titan Logix Corp. is a public company listed on the Toronto Venture Stock Exchange and its shares trade under the symbol, TLA.
