

George Franklin Shaw

The Board of Directors, management and staff of Titan Logix Corp. express our condolences at the passing of George Franklin Shaw (Mar 13, 1937 - Oct 18, 2010). George had been a major investor in Titan since it's restructuring in 1980 and he served as a Director, Chairman of the Audit Committee, President, Chief Executive Officer and Chairman of the Board over a 24 year period until his retirement from Titan in 2003. His commitment and contributions to Titan created the platform for Titan to evolve as a global market share leader in advanced mobile tank level measurement, control and fluid logistics/asset management. He also managed and directed the oil & gas assets for Titan until his retirement. Our condolences are offered to his family, friends and many associates..

George was born in Creston, BC and spent most of his formative years in Regina and Yorkton. He received his CA designation in 1965 and shortly thereafter moved to Esterhazy where he headed Parker and Quine until 1975 and then started Gibson Shaw Skilnick and Kemp. George took a position within an Esterhazy construction company. It was through George's affiliation with the Esterhazy construction company that he became involved with Titan during Titan's mining exploration days.

A memorial was held in Surrey, BC on October 20, 2010. George's commitment, dedication and contributions to Titan's success are sincerely acknowledged.
