

Two Year Performance Guarantee

Titan Logix Corp offers a performance guarantee of two (2) years on the Visi-ACID probe (product number "TH008") to perform as designed for two years from the date of purchase. The Guarantee is valid upon the acceptance of a completed application data sheet by a qualified Titan Logix Corp. representative prior to purchase, delivery, and installation. The application data sheet will define the conditions in which the product will be installed as well as the liquid that will be measured. Use of this product in applications not defined in the application data sheet will void the warranty.

This Guarantee is pursuant to users following proper maintenance and cleaning protocols of the probe for the duration of the two (2) year period, i.e. flushing the tanker and probe thoroughly with fresh water prior to storage.

Titan Logix Corp. reserves the right to refuse warranty service if it has been determined that the conditions outlined in the application data sheet have been violated or proper maintenance has been neglected
