

INTRODUCING THE NEW FINCH II MULTICOMPARTMENT DISPLAY

With the latest Finch II Multicompartment Display, it is now possible to monitor tank levels in **real-time** for up to **six** compartments (up to **five** compartments with Rack Control) using only **one** Finch II Multicompartment Display.

This **eliminates** the need for multiple displays or selector switches and **results** in **lower** installation **and** equipment costs while providing a **superior** user experience and the most **accurate** and **reliable** multicompartment overfill protection in the industry today.

FEATURES

- The Finch II integrates with our TD100 Series system and provides multiple options for fail-safe overfill prevention.
- All compartments are fail-safe with no missed alarms.
- Enhanced visual and audible alarm feature and system error codes.
- Weatherproof display for exterior installations. Type 4/4X, NEMA 4/4X
- Real-time compartment monitoring for up to six compartments, five compartments with rack control with only one Finch II.
- Allows the control of pumps, PTOs, valves, and engine shutdown systems.
- Bluetooth connectivity with Titan's mobile monitoring app to be released later this year.
- CSA-approved for hazardous areas, Class 1, Div. II
